Name of Material: Kdg Number Line 0-10, 0-20 (Optional)

Assembly/printing instructions:
0-10 Number Line—Copy one number line for each child and place in a sleeve protector.

Activities this material is used in:
Introduction to the Number Line
Number Line Word Problems

Additional Information:
Some teachers choose to use the larger number line (one on each page) as a teacher model to demonstrate how to use it, while the children use the smaller ones (three on each page) so they can practice more than once.
A longer Number Line (0-20) is also available here IF children need higher numbers. If you choose to introduce this one, it should be printed and assembled to be a continuous line.
